

Data APIs

This feature requires a **CommCare Software Plan**

This feature (API Access) is only available to CommCare users with a Standard Plan or higher. For more details, see the [CommCare Software Plan page](#).

Data APIs

These APIs are intended for building project specific applications and integrations, including:

- Custom end-user applications that address project-specific needs
- Custom integrations with external back-end systems, such as an electronic patient record system

In the following, [version] should always be replaced with one of v0.4, v0.3, etc. These documents only describe the latest version - prior versions remain available only to support backwards compatibility with *deployed systems*, not for general use. The latest version is **v0.5**.

API	Description	URL Endpoint	Permission required	Status
Groups	list groups	https://www.commcarehq.org/a/[domain]/api/[version]/group/	Edit Mobile Workers	
Users	list users	https://www.commcarehq.org/a/[domain]/api/[version]/user/	Edit Mobile Workers	
Cases	list cases	https://www.commcarehq.org/a/[domain]/api/[version]/case/	Edit Data	
Case Data	find a single case	https://www.commcarehq.org/a/[domain]/api/[version]/case/[case_id]/	Edit Data	
Forms	list form submissions	https://www.commcarehq.org/a/[domain]/api/[version]/form/	Edit Data	
Form Data	find a single form	https://www.commcarehq.org/a/[domain]/api/[version]/forms/[form_id]/	Edit Data	
Fixture Data	find a single fixture	https://www.commcarehq.org/a/[domain]/api/[version]/fixture/[fixture_id]/	Edit Apps	
Single Sign On	check login credentials	https://www.commcarehq.org/a/[domain]/api/[version]/sso/	Valid Login
