CommCare in Action

[View other CommCare Videos](#) for examples of apps, technology overviews, and partner videos showing CommCare in use.

Explore CommCare

1. Create an account.

Sign up for a CommCare account [here](#). If you're exploring CommCare for use at your organization, request a free trial of the full CommCare platform.

Alternatively, if you're just starting to explore data collection on your own, you also have the option to create a free account on our Community plan—a limited version of CommCare designed to give you a feel for our platform.

2. Add an application

Go to the Applications section of your CommCareHQ project space and try following the [Beginner Tutorial](#) to build a basic app.

3. Create a Mobile Worker account

Go to the Users section of CommCareHQ to create a mobile worker account. Detailed instructions are available at [Create and Manage CommCare Mobile Workers](#). You will use this mobile worker account to log into your application.

4. Install your Application on a Phone or Tablet

Once you have built a form or copied an application from the Exchange you can download it to a mobile device - we suggest using an Android phone or tablet.

First, install CommCare for Android from the Google Play Store, and load your application. Detailed instructions are at [Install CommCare for Android Smartphones](#).

Log in with your mobile worker account and start using the app!

Want to try a CommCare app on your Android device without creating an app on CommCareHQ?

Do you have an Android phone or tablet?

Do you want to just quickly install an application and try it out?

Step 1: Install CommCare for Android

Search for CommCare in the Google Play Store, or scan the following barcode to go directly to the correct page:

Step 2: Install a demo version of the Millennium Villages Maternal and Child Health App

Open CommCare and then scan this barcode:

(or enter <http://bit.ly/1rTASrm>)

Step 3: Login and Explore
